-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

The drawings are objected to because they contain foreign language text. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct

Art Unit: 3625

any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: the specification, including the claims, appears to be a direct translation of the Japanese priority document. It contains idiomatic and grammatical peculiarities. Applicant should re-read the specification in an effort to place it in a better U.S. form.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and

Art Unit: 3625

distinctly claim the subject matter which applicant regards as the invention.

In claim 9, line 3: "means" should read as --steps--.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 9-16, 18, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Jacobs (U.S. Patent No. 5,550,746).

Jacobs discloses a system, media, methods, and server for facilitating the ordering of combination items (col. 7, lines 18). Jacobs discloses that stored component designs are compared to customer input to build a custom combination (see col. 10, line 54-col. 11, line 23).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 8, 17, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jacobs (U.S. Patent No. 5,550,746) in view of Hutton (U.S. Patent No. 5,440,479).

Jacobs does not disclose flowers.

Hutton, however, discloses flower combinations formed by a customer. Said combinations comprise component flower elements (col. 4, lines 41-68).

It would have been obvious to one of ordinary skill in the art to have provided Jacobs to have included the teachings of Hutton in order to have provided flower arrangements based upon embedded expert knowledge judgments based upon customer selection criteria.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Slotznick (U.S. Patent No. 5,983,200) discloses an intelligent agent for executing delegated tasks.

Kolawa (U.S. Patent No. 6,370,513) discloses a method and apparatus for automated selection, organization, and recommendation of items.
